Stop "via gmail.com" & Spam: 100% Free Lifetime Setup
Official Brevo DKIM Domain Authentication + Gmail SMTP Relay (300 Free Emails / Day)

STEP 1 Add Domain in Brevo (Free)

1. **brevo.com** par free account banayein (300 emails/day free forever).
2. Top-right profile ➔ **Senders & Domains** ➔ **Domains** tab par jayein.
3. Click **"+ Add a domain"** ➔ Apna domain enter karein (e.g. **ninetech.cloud**).

STEP 2 Add Official DKIM & SPF in Cloudflare DNS

dash.cloudflare.com open karein ➔ Domain select karein ➔ **DNS** ➔ **Records** me ye 3 TXT records add karein:

Type	Name / Host	Content / Value	Proxy Status
TXT	`mail._domainkey`	`k=rsa; p=MIGfMA0GCSqGSIb3DQEBAQUAA4GNADCBiQ...` *(Brevo DKIM Signature)*	DNS only
TXT	`@ (root)`	`v=spf1 include:spf.brevo.com include:_spf.mx.cloudflare.net ~all`	DNS only
TXT	`_dmarc`	`v=DMARC1; p=none; sp=none;`	DNS only

Save karne ke baad Brevo me **"Authenticate this domain"** click karein jab tak **[Authenticated / Active]** na dikhe.

STEP 3 Generate Brevo Master SMTP Key

1. Brevo top-right menu ➔ **SMTP & API Keys** (`app.brevo.com/settings/keys/smtp`) me jayein.
2. Click **"Generate a new SMTP key"** button.
3. Key name daalein: **Gmail SMTP Relay** ➔ Click **Generate**.
4. **MASTER KEY COPY KAREIN: xsmtps-8f92a1bc3d4e5f6a...** *(Ye key Step 4 me Gmail ke Password field me use hogi)*

STEP 4 Connect Brevo SMTP Relay in Gmail Settings

1. **mail.google.com** ➔ **Settings** ➔ **See all settings** ➔ **Accounts and Import** tab me jayein.
2. **"Send mail as"** me click karein **"Add another email address"**.
3. Name: Apna naam | Email: **support@yourdomain.com** | Uncheck *"Treat as an alias"* ➔ Next.
4. Form me Brevo SMTP credentials enter karein:

SMTP Server: smtp-relay.brevo.com	**Port: 587** (Secured with TLS)
Username: Brevo login email	**Password: Brevo Master SMTP Key** (xsmtps-...)

5. Click **"Add Account"**. Gmail confirmation code aapke custom email par bhejega (jo inbox me aayega). Code enter karke **Verify** karein!

[PASS] Live Verification Checklist (How to Confirm It Works):

Apne custom domain se kisi bhi email par message bhejein, aur received email me **"Show details (to me v)"** par click karke check karein:

signed-by:	security:	via gmail.com:	Destination:
yourdomain.com [PASS]	TLS Secured	NONE [100% GAYAB]	Primary Inbox [NO SPAM]
