Custom Domain: `zaldo@ninetech.cloud` → **Cloudflare Routing:** `100% Free Bridge` → **Personal Gmail:** `anwar@gmail.com`

1 Cloudflare Email Routing (Incoming Emails Ke Liye)

Apne domain ki saari mails personal Gmail par forward karne ke liye:

1. **Cloudflare Dashboard** → Domain (`ninetech.cloud`) → **Email** → **Email Routing** me jayein.
2. **"Enable Email Routing"** par click karke DNS records automatically add kar dein.
3. **Routing rules** tab me **"+ Create address"** par click karein:

Custom Address	Action	Destination
`zaldo` @ninetech.cloud	`Send to`	`anwar@gmail.com` (Aapka personal Gmail)

4. Gmail me verification mail aayegi, link par click karke verify karein. **Incoming ready!**

2 Google 16-Digit App Password (Outgoing Sending Authorization)

Gmail se custom email ka reply bhejne ke liye 16-letter secure code generate karein:

1. Browser me open karein: `myaccount.google.com/apppasswords` (2-Step Verification ON honi chahiye).
2. App Name me type karein: `Custom Domain Mail` → Click **"Create"**.
3. Yellow box me jo 16-character code aayega use copy karein:

```
abcd efgh ijkl mnop
```

3 Gmail SMTP Setup (Directly zaldo@ninetech.cloud Se Bhejne Ke Liye)

Gmail me apna custom email configure karein:

1. Gmail → **Settings** ⚙️ → **See all settings** → **Accounts and Import** tab me jayein.
2. **"Send mail as:"** ke samne **"Add another email address"** par click karein.
3. Name: `Anwar` | Email: `zaldo@ninetech.cloud` → Next Step.
4. SMTP Configuration Table:

SMTP Server	Port	Username	Password	Security
`smtp.gmail.com`	`587`	`anwar@gmail.com`	`Step 2 ka 16-digit code`	`TLS (recommended)`

5. **"Add Account"** par click karein aur Gmail me aaye verification code ko enter karein. **BOOM! IT WORKS!**

💡 **1-Click Pro Setting:** Gmail Settings → *Accounts and Import* → *When replying to a message* me select karein: **"Reply from the same address the message was sent to"**. Isse corporate mail ka reply automatically corporate mail se hi jayega!
